

Orion Jett

Senior Full-Stack Web & Blockchain Developer

Austin, TX 78701
San Francisco, CA 94103
gozygeory@gmail.com
+1 (542) 837-2065

Experienced Senior Full-Stack Web & Blockchain Developer with a proven track record of designing and implementing scalable web applications while leveraging blockchain technologies. Skilled in modern web technologies and adept at leading project lifecycles for complex applications in agile environments.

Professional Experience

Lead Full-Stack Developer *Basecamp, Chicago, IL | March 2016 - October 2021*

- Led a team of developers in architecting and developing high-performance web applications using Python, React, and Node.js.
- Designed and implemented secure back-end systems and APIs for seamless data flow in front-end applications.
- Collaborated with stakeholders to define project requirements and ensure timely delivery of key milestones.
- Contributed to the integration of blockchain technology into existing projects, optimizing for performance and security.

Blockchain Developer *Alchemy, San Francisco, CA | December 2021 - September 2025*

- Developed smart contracts and decentralized applications using blockchain platforms such as Ethereum and Solidity.
- Implemented Web3 integration for seamless interaction between front-end applications and blockchain networks.
- Participated in the design and optimization of blockchain architectures for scalability and efficiency.
- Conducted code reviews and provided technical guidance on blockchain-related projects.

Education

Bachelor of Science in Computer Science (B.S.) in Computer Science *Boise State, Boise, Idaho (ID) | May 2012 - January 2016*

A comprehensive field combining the principles of computer science, software development, and information systems management to design, implement, and maintain technology solutions that meet the needs of businesses and users. It encompasses areas such as programming, network administration, cybersecurity, data management, and digital innovation. Graduates are equipped with the technical skills and analytical thinking necessary to solve complex problems, develop secure systems, and drive digital transformation across industries. The field emphasizes practical experience with modern tools, coding languages, and emerging technologies like artificial intelligence, cloud computing, and blockchain.

Key Skills

- Python
- Node.js
- React
- Angular
- MongoDB
- REST APIs
- Ethereum
- AWS
- SQL
- Encryption
- Machine Learning
